What is FC2?

FC2 is an OTC female condom designed to be inserted into the vagina.

PROTECTION

- **Indications:** To prevent STI transmission (including HIV) and unplanned pregnancy
- **Comparable to male condoms,** FC2 offers *dual protection* against STIs (including HIV) and unplanned pregnancy (Bounds et al. 1992, Farr et al. 1994; Trussell 1998; Soper et al. 1993, Fontanet et al. 1998, Feldblum et al. 2002, French et al. 2003)
- **FC2 offers highly effective protection** against STI transmission (including HIV), by providing a barrier which prohibits the exchange of (sexual) body fluids and reduces skin-to-skin contact

COVERAGE UNDER ACA

- **FC2 is an over-the-counter female contraceptive** that can be prescribed to patients with no out-of-pocket expense, per the Affordable Care Act: "The contraceptive methods for women currently identified by FDA include(s)...female condom"

NO COMPROMISES

- Consists of a nitrile (non-latex) sheath and outer ring, and a polyurethane inner ring
- **Includes no spermicidal additives**
- Lubricated with a silicone-based lubricant inside and out
- The only FDA approved female condom, and is classified as a Class III medical device, proven safe and efficacious
